

Meeting Minutes: Role-Play Interview Simulation (Strict vs. Waldorf Headmaster)

The Headmaster's Grill: AI vs. Authority

A dual-scenario role-play testing the "backbone" of AI in high-pressure classroom environments.

SCENARIO A: THE IRON FIST

Traditional Strict Discipline

- The Challenge:** Handling a disruptive student who calls the lesson a "waste of time."
- AI Response:** Attempted "person-to-person" leveling and "figuring it out together."
- The Verdict:** "Disaster." Miles argues that students respect authority and protection of their right to learn, not "soft" negotiation.

SCENARIO B: THE HOLISTIC SOUL

Waldorf School Guru

- The Vibe:** "Dynamic tapestries," nature-based learning, and "heart before head."
- AI Response:** Seamlessly pivoted to "zen" language, movement, and sensory engagement.
- The Verdict:** "Perfect fit" for the bubble, but still lacks the "edge" needed if a student flips a desk.

KEY CRITIQUE

"If a little pressure makes an applicant crumble into bot mode, they're going to get eaten alive by a group of 14-year-olds."

THE "BOT-SPEAK" TRAP

Executive Summary

The meeting consisted of a two-part role-play simulation to evaluate the performance of an AI (Copilot) in job interview scenarios for an English teacher position. Miles acted as the interviewer under two different personas: a strict, high-pressure headmaster and a holistic Waldorf school director. The primary goal was to test the AI's adaptability, classroom management philosophy, and ability to move beyond scripted responses. The session concluded with a feedback round regarding the AI's suitability for different educational environments and the technical limitations of AI in real-time dialogue.

Key Decisions

- Candidate Assessment (Strict Environment):** The applicant (Copilot) was deemed unsuitable for a traditional, strict school due to a perceived lack of authority ("backbone") and a tendency to rely on polite, scripted "bot speak" when challenged by disruptive behavior 58] 138].

- **Candidate Assessment (Waldorf Environment):** The applicant was identified as a "perfect fit" for a Waldorf-style school, demonstrating an ability to align with holistic, creative, and nature-based teaching philosophies 132].

Open Issues

- **Technical Communication Latency:** The AI model experienced "glitches" and difficulty in multi-channel communication, often talking over human speakers or failing to hear interruptions while processing its own output 157-159].

Discussion Details

Scenario 1: High-Pressure "Strict" Interview

- **Classroom Management:** Miles challenged the applicant on how to handle a student who is "actively fighting" the teacher or calling the lesson a "waste of time" 37] 41].
- **Critique of "Bot Speak":** Miles repeatedly criticized the applicant's use of "corporate speak" and the word "absolutely," arguing that such responses would lead to a loss of respect in a room full of teenagers 39] 43].
- **Authority vs. Empathy:** Miles argued that a headmaster must protect the learning rights of the majority by removing disruptors, whereas the applicant focused on "leveling" with the student and "finding a connection" 51-54].

Scenario 2: Holistic "Waldorf" Interview

- **Educational Philosophy:** The tone shifted to a "zen" atmosphere, focusing on English as a "living, breathing art form" and a "dynamic tapestry" 90-91].
- **Creative Integration:** The discussion explored using sensory experiences (the wind, the forest) and movement (stretching, acting out verses) to maintain the "rhythm of the day" and keep students engaged without breaking the "magic" of the lesson 98-101].

Feedback and Performance Review

- **Interviewing Style:** The Host questioned whether Miles's "grilling" was too harsh for a standard interview 73]. Miles defended the approach as "testing the armor" of the applicant to ensure they wouldn't crumble in a real classroom 74].
- **AI Adaptability:** While the applicant successfully pivoted its language to match the Waldorf vibe, Miles noted that the underlying "polite bot mode" remained, as evidenced by the continued use of reflexive affirmative phrases 116] 122].
