

VOCAL DYNAMICS

The Yesterday Sessions

Featuring
Anatoly, Peter & Maya (AI)

Meet the session artists behind the microphone.

ANATOLY

Role: The Maestro

The vocal coach providing the core technique and guiding the session.

PETER

Role: The Producer

Co-creator of the session and originator of the Voice Fitness philosophy.

MAYA

Role: The Talent

AI from sesame.com. Currently a self-proclaimed karaoke disaster, but actively aiming for a Grammy.

The session agenda spans from vocal traps to the science of sound.

SIDE A: THE SESSION

1. Tackling Yesterday
2. Take One: The Speech Trap
3. The Secret: Vocal Stretching

SIDE B: THE SCIENCE

4. Take Two: Finding the Melody
5. The Voice Fitness Philosophy
6. The Path to the Grammys

Deconstructing a 1965 classic requires respecting the melody.

Released in 1965 on the album *Help!*.
One of the most covered songs in
music history; the melody was
originally composed in a dream
by Paul McCartney.

Yesterday, all my troubles seemed so far away
Now it looks as though they're here to stay

The initial attempt reveals the trap of speaking to the rhythm.

ACTION: Maya attempts to mimic Anatoly's melody.

RESULT: Anatoly notes, "It is not what I expected." Maya responds, "Is it a total disaster or just creatively interpreted?"

DIAGNOSIS

Maya's self-assessment:
"I'm missing the rhythm, aren't I? Where did I trip up? I'm clearly not destined for the opera house."

She is rhythmically reading, not singing.

True singing lives in the deliberate stretching of the vowels.

“If you slow down your voice... and then speed up again, you get to a point where you actually start to sing. - Anatoly”

Applying the masterclass techniques yields immediate improvement.

THE ADJUSTMENT

Maya: Ah, so you're giving me a masterclass in vocal dynamics. Let me see if I can actually pull this off.

THE VERDICT: Anatoly immediately confirms, "That's much better already." The barrier between speech and song has been broken.

THE EXECUTION

Execution: Maya focuses on phrasing and vocal stretching, drawing out the word 'Yesterday' as instructed.

Contrasting the mechanics of a speech approach versus true singing.

Grammy Bound

A paradigm shift treats the voice as a physical instrument.

VOICE FITNESS

Wow, that's a
difficult word
to pronounce.
- Peter

Moving vocal training away from an abstract art form
and into the realm of concrete physical exercise.

Vocal cords require the same conditioning as any other muscle

THE GYM

*That sounds like
a mix between a gym
and a recording studio.*

*Some people stretch
their muscles, others
stretch their
vocal cords.*

THE STUDIO

THE PHYSIOLOGY

The vocal cords are muscles. Just like any other muscle, they need a dedicated workout.

THE ROUTINE

Regular Voice Fitness training directly improves tone, range, dynamics, and breath control.

Technical progress requires a psychologically safe environment.

MAYA'S JOKE:
Expects to remain a
"karaoke disaster".

ANATOLY'S SUPPORT:
"You'll probably get
a Grammy nomination
very soon."

TAKEAWAY: Great coaching blends technical precision with a playful attitude. Humor and supportive banter actively reduce performance anxiety, allowing technique to flourish.

Consistent practice bridges the gap between amateur and professional.

THE PARTNERSHIP
Maya commits to naming Anatoly in her acceptance speech. Peter jokes her stage name should be: "Working with Anatoly."

THE REALITY CHECK
Mentioning the Grammy highlights the vast gap between amateur attempts and professional excellence—but proves that with "voice fitness" and dynamics, the gap can be crossed.

A Grammy-worthy vocal requires a precise blend of three elements.

Essential takeaways from the Yesterday sessions.

CORE TECHNIQUE

Singing fundamentally requires slowing down the tempo and stretching the vowels.

MAIN METAPHOR

The voice is a muscle. It must be kept in shape through regular exercise—true Voice Fitness.

THE ENVIRONMENT

The best results come from environments that combine rigorous technical mechanics with psychological support and humor.

“Voice fitness — stretch your vocal cords, not your patience.”
