

AI-Enhanced Learning: A Deep Dive into *Catch Me If You Can*

AI-Enhanced Learning: A "Catch Me If You Can" Case Study

A collaborative English lesson exploring cinematic themes through generative AI tools.

CORE DISCUSSION

Cinematic Analysis & Deception

The session centered on the movie *"Catch Me If You Can"*, dissecting the dynamic between **Frank Abagnale** (glamour/deception) and **Carl Hanratty** (methodical/respectful). They explored Frank's backstory of divorce and his uncanny ability to "read the room."

Student Persona

Anatoly (Moscow)
Accountant & AI Explorer

Tutor Persona

May (Philippines)
Gardener & Karaoke Lover

"Fraud is a high-level game of wit. Most people see exactly what they want to see." — **Virtual Frank (AI Roleplay)**

AI Toolkit Deployed

- **Gemini:** Presentation Design
- **Sesame:** Voice Role-playing
- **DeepSeek:** General Assistance
- **Custom Model:** Interactive Quiz Game

26m

Lesson Duration

Features: Interactive PDF, Live Game, Virtual Character Interaction.

Recorded: Sept 08, 2026

This document summarizes an interactive English lesson between tutor May and student Anatoly, focusing on the film *Catch Me If You Can*. The session stands out for its extensive use of AI tools to facilitate roleplay, presentation design, and interactive gaming.

Cultural Exchange and Personal Backgrounds

The session began with a brief exchange regarding local climates and personal interests. Anatoly, an accountant based in Moscow, noted an unseasonably cold start to autumn with temperatures around 10-11°C, while May shared her life in the Philippines, balancing teaching with her passions for gardening and karaoke. A shared interest in cinema served as the bridge to the lesson's core topic, specifically the film *Catch Me If You Can*, which Anatoly chose based on May's listed preferences [00:04-03:39](#).

Thematic Analysis of *Catch Me If You Can*

Anatoly utilized an AI-generated presentation to guide a discussion on the film's central themes: glamour, deception, and the pursuit. The conversation highlighted the complex relationship between the protagonist, Frank Abagnale Jr. (Leonardo DiCaprio), and FBI agent Carl Hanratty (Tom Hanks). They explored how the audience often sympathizes with Frank despite his criminal actions, attributing his path to the trauma of his parents' divorce. The duo discussed iconic scenes, including Frank posing as a substitute teacher and his ingenious use of model airplane decals to forge checks [04:09-07:10](#) and [10:34-13:44](#).

Character Dynamics: The Chase

Frank Abagnale Jr.

Attractive, clever, and sympathetic.
Driven by a broken family to seek
success through wit and fraud.

Carl Hanratty

Punctual, methodical, and persistent.
Eventually develops a relationship of
mutual respect with his target.

"A high-level game of wit where both sides eventually gain mutual respect."

Advanced AI Integration in Language Learning

The lesson was notable for Anatoly's integration of multiple AI platforms to enhance the learning experience. He demonstrated a "Virtual Frank" roleplay using an AI service, allowing May to interview the character about his motivations. Furthermore, Anatoly showcased a custom interactive trivia game he built to test knowledge of the film's plot and vocabulary. The presentation itself featured sophisticated design elements like simulated paper tears and paperclips, all generated via AI tools, which May found highly impressive and engaging [07:13-09:27](#)[17:37-23:37](#).

Anatoly's AI Tech Stack

Gemini Notebook: Used for creating the visual presentation and slide design.

Sesame: Employed for the interactive voice roleplay with the "Virtual Frank" character.

DeepSeek & Chinese Models: Utilized for developing the interactive trivia game and coding logic.

Key Data

- **Moscow Weather:** Currently +10°C to +11°C, expected to rise to +17°C [00:04](#).
- **Film Fact:** Frank Abagnale Jr. was only 15 years old when he began his exploits [21:58](#).
- **Career Outcome:** The real Frank eventually became an FBI consultant on bank security [21:58](#).

To-Do / Next Steps

- Anatoly to provide the specific link for the AI-generated interactive game [25:08](#).
- May to access the provided link after 30 minutes to review the automated conversation description and summary [25:08](#).
- Anatoly to share the name of the Chinese AI model used for the game development [25:08](#).

Conclusion

This lesson served as a compelling case study for the future of education, where the student takes an active role in content creation using AI. By blending cinematic analysis with interactive technology, Anatoly and May achieved a high level of engagement that transcended standard conversational practice.
