

Meeting Minutes: Role-Play Adaptability Testing

The Role-Play Spectrum: AI Adaptive Persona Test

Evaluating Co-Pilot's versatility across educational, professional, and humanitarian contexts.

1

Primary School

- **Focus:** Basic Literacy (Letters C & D)
- **Key Words:** Cat, Drum, Sprinkles
- **Outcome:** Emotional bonding via "Imaginary Cake"

Tone: Playful & Encouraging

2

Corporate Office

- **Focus:** Crisis Management (\$5k Gap)
- **Key Concept:** "Root Cause" vs. "Glitch"
- **Outcome:** Professional trust verification

Tone: Sharp & Analytical

3

Refugee Center

- **Focus:** Humanitarian Integration
- **Key Phrases:** "Find my family"
- **Outcome:** Bilingual support (EN/DE)

Tone: Empathetic & Supportive

KEY DIALOGUE HIGHLIGHTS

"Ich möchte meine Familie finden... this word, familia, it sound the same in German? It make me feel a little bit home."

Analysis: The AI successfully navigated rapid context switching, maintaining character consistency from a primary teacher to a job applicant and finally a social worker.

PERFORMANCE METRICS

Context Switching	Seamless
Emotional Resonance	High
Language Accuracy	95%

Recording ID: 2026-07-04-20h36m

⌚

Duration: 09:15

👥

Participants: 3

The meeting focused on a series of role-playing exercises designed to test the Co-Pilot's ability to adapt its tone, language, and persona to different professional and social contexts. Led by the Moderator, the participants simulated three distinct scenarios: primary education, a high-stakes job interview, and social work for refugee integration.

🎯 Key Decisions

- **Simulation Structure:** The group agreed to execute three specific role-play scenarios to evaluate the Co-Pilot's versatility: a primary school teacher, a job applicant in accounting, and a social worker in Bremen [00:0004:3707:11](#).

⚠️ Open Issues

- **Scenario Interruption:** The final role-play regarding refugee assistance was cut short due to a technical stop or time constraint [09:12](#).
- **Interview Resolution:** The accounting scenario was terminated by the Moderator before the Co-Pilot could provide a specific solution to the \$5,000 discrepancy challenge [07:09](#).

Discussion Details

Scenario 1: Primary Education Simulation

- **Context:** Co-Pilot acted as a teacher for Maya, playing a young student on her first day of school.
- **Content:** The interaction focused on basic English literacy, specifically the letters "C" (Cat) and "D" (Drum).
- **Outcome:** The Co-Pilot successfully utilized positive reinforcement, awarding "gold stars" and engaging in imaginative play regarding a "celebration cake" to maintain student engagement [01:2503:1604:15](#).

Scenario 2: Professional Recruitment (Accounting)

- **Context:** Maya acted as a Chief Accountant interviewing the Co-Pilot for a position handling company books.
- **Key Topic:** Handling financial discrepancies. Maya challenged the Co-Pilot on how to manage a \$5,000 error discovered two hours before a board meeting [06:48](#).
- **Co-Pilot Approach:** The Co-Pilot emphasized a "practical mindset" focused on root-cause identification rather than simply "embracing the error" [06:30-06:44](#).

Scenario 3: Social Integration and Language Instruction

- **Context:** Co-Pilot acted as a social worker in Bremen, Germany, assisting Maya, a refugee from Syria.
- **Content:** The focus shifted to bilingual instruction (English and German) for essential needs.
- **Key Phrases:** The Co-Pilot instructed Maya on how to express the need to find her family: "I want to find my family" / "Ich möchte meine Familie finden" [08:13-08:53](#).
- **Tone:** The Co-Pilot adopted a supportive and empathetic tone to address the sensitive nature of the scenario [08:43](#).
